Major app stores across 50+ countries

Live on the web: results updated 365 days a year

Sophisticated proprietary algorithms

Unique methodology

The background of the slide features a network graph with nodes and edges. The nodes are represented by spheres of varying sizes, and the edges are thin black lines connecting them. The graph is partially obscured by a dark blue horizontal band containing the title text.

# Developer research: qual and quant

A close-up, black and white photograph of a precision instrument dial, likely a pressure gauge or similar measurement device. The dial features a circular scale with fine markings and larger numerical labels such as 970, 730, 720, and 960. The word "OIL" is partially visible on the dial face. A needle is visible, pointing towards the right side of the scale. A blue semi-transparent rectangular overlay is positioned on the left side of the image, containing white text. The overall image has a technical and industrial feel.
