

Infrastructure Analysis

Infrastructure Analysis is a comprehensive service dedicated to the analysis of vendor performance, routes to market and end user deployment for IT infrastructure, including servers, storage and networking. It combines with Canalys' channel expertise and continuous research programs.

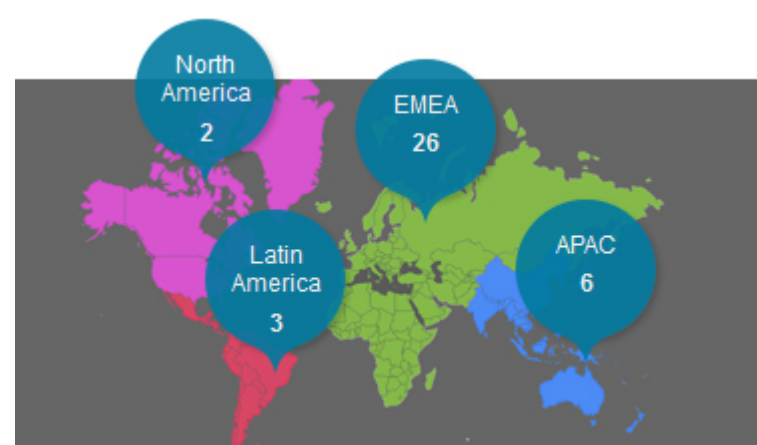

Content overview

This service covers a range of content, with a focus on:

- Servers (industry standard blade, rack, tower)
- Storage
- Networking (Ethernet switch, wireless LAN, enterprise routers, service provider routers)
- Channel splits and end-user splits
- Quarterly estimates: infrastructure shipment estimates and forecasts
- Vendor Point of View reports
- Market performance indexes: servers and storage, wireless LAN vendor and switch vendor
- By country and business demographic overview
